

13000+ choices for

# Antibody

## Rabbit pAb Mouse mAb

Various-labeled secondary antibodies

### Wide Choices

12,000 kinds of rabbit pAb and mouse mAb, including Loading control antibodies and Tag antibodies, Micromolecule antibodies, Negative control antibodies etc.

### Advantages

### Various-labeled secondary antibodies

More than 100 kinds of labeled secondary antibodies are applied in rabbit, mouse, rat and human, and the markers include HRP, AP, Biotin, FITC, Alexa Fluor 488, Cy3 etc.

### Multiple Validation

ELISA, WB, IHC, IF, IP and FC were verified, and a wide range of species cross-reactive assays were carried out.

## Featured Poly-HRP Secondary Antibodies

01

With strong specificity and low background, the results are more accurate, bright and clear;

02

Enhance the signal amplification intensity, and the operation is simple;

03

Using non-biotin labeling to avoid nonspecific reaction caused by endogenous biotin in tissues.
