

Recombinant Human HP1 alpha

Catalogue No.:	P5212
Species:	Human
Uniprot ID:	P45973
Expression Region:	1-191
Host:	E.Coli
Tags:	N-terminal His Tag
Molecular Weight:	20.9 kDa under reducing conditions
Purity:	Greater than 95% as determined by SDS-PAGE
Formulation:	Lyophilized from a 0.2 μ m filtered solution in 10 mM Hepes, 500 mM NaCl with 5% trehalose, pH7.4
Reconstitution:	Centrifuge the vial prior to opening, reconstitute in sterile distilled water or buffer of interest to a concentration of 0.1-1mg/ml by gently pipetting 2-3 times, don't vortex.
Storage:	The lyophilized protein is stable at -20°C for up to 1 year, the protein solution can be stored at 2-8°C for up to 1 week. For extended storage, it is recommended to further dilute in a buffer containing 0.1% BSA (make sure BSA will NOT interfere with your experiment) and store in working aliquots at -20°C to -80°C for 6 months. Avoid repeated freeze/thaw cycle.

Synonyms: Antigen p25, CBX5, CBX5_HUMAN, CG8409, Chromobox 5, Chromobox homolog 5, Chromobox homolog 5 (HP1 alpha homolog, Drosophila), Chromobox protein homolog 5, Epididymis luminal protein 25, HEL25, Heterochromatin protein 1, Heterochromatin protein 1 alpha

SDS-PAGE:

Safety Note: This product is intended for research and manufacturing uses only. It is not a diagnostic device. Product degradation will result from multiple freeze/thaw cycles. It is suggested that the antigen be stored in use size aliquots and thawed just prior to use. This material has been inactivated, however as with all biological materials, it should be handled as potentially infectious. The user assumes all responsibility for care, custody and control of the material, including its disposal, in accordance with all regulations.
